

# About Us

Established in 2018, True Grade Group set out with a clear vision – to deliver concrete structures and slabs of the highest standard.

Based on the Bellarine Peninsula, we proudly service Geelong, the Surf Coast, and surrounding regions, and are always willing to travel for the right project.

# At True Grade, we know every project carries a vision.

We work with builders, architects, clients, councils, and government authorities to bring those visions to life – through precision, collaboration, and workmanship that stands the test of time.

From small beginnings, we have grown into a skilled and committed team recognised for delivering high-quality in-situ concrete works across architectural residential, commercial, marine, and infrastructure projects.

# Our Capacity

At True Grade Group, we have the team, equipment, and expertise to deliver every stage of a concrete project – from early works through to final reinforced concrete structures.

We handle the full scope of works in-house, including:

- Bulk Site Cuts and Earthworks
- Footings and Foundations
- Steel Fixing
- Slab Boxing and Structural Formwork
- Concrete supply, placement, and finishing for all types of slabs
- Quality Reinforced Concrete Structures

This full-service capability gives us total control over quality, safety, and scheduling – ensuring every project runs smoothly from start to finish.

# What We Do

## Architectural & Residential

Custom homes, architectural concrete finishes, driveways, paths, suspended slabs, and bespoke detailing.

---

## Commercial

Ground slabs, multi storey suspended slabs, columns and walls, car parks, stairs, structures and decorative paving concrete.

---

## Marine Construction

Jetties, sea walls, boat ramps, and marine-grade concrete works for durability and performance.

---

## Infrastructure

Bridges, culverts, drainage, water retention structures and weirs, retaining structures, and authority works (including Barwon Water)

# Extensive Fleet, Tools & Equipment

Our wide range of plant, equipment, and specialised tools allow us to take on projects of varying size and complexity.

We are fully equipped for:

- **Earthworks and site preparation**
- **Formwork systems for slabs, suspended decks, walls, and complex structures**
- **Concrete placement and finishing using professional-grade equipment and machinery**

All plant and machinery are site-ready with current risk assessments, maintenance logs, and compliance documentation to meet industry standards.

# Why Choose Us

We are hands-on, solutions-focused, and work closely with builders, engineers, and clients to achieve the best results.

No matter the scope or complexity, we approach every project with professionalism, attention to detail, and pride in our workmanship.

- 
- **Proven track record of high-quality, on-time project deliver.**
  - **Trusted by leading builders, councils, and authorities across the region.**
  - **Strong local relationships and a dependable, solution-driven team.**
  - **We take pride in our work and stand behind every pour.**
  - **Local knowledge, professional service, and genuine craftsmanship.**
-

# Our Team

Our crew of skilled and knowledgeable tradesmen bring the right attitude, experience, and collaboration to handle all types of challenging work with ease.

We take pride in our positive culture, strong communication, and a can-do mindset that ensures we always deliver high-quality outcomes safely and efficiently.

A modern building with a mix of light-colored stone and dark wood cladding. The building has a unique, angular design with a small, dark, rectangular window. The foreground shows a dirt path and some greenery, including a small tree and some bushes. The sky is a clear, light blue.
